

U.S. Department of Labor

Mine Safety and Health Administration

MSHA's Small Mine Office—Serving the small mines in America

Week 25

Location: _____ Supervisor: _____

Date: _____ Time: _____ Duration: _____

1) Falls From Equipment

- ☐ Falls are one of the most frequent causes of injury for operators, oilers, and mechanics
- ☐ Oil, grease, mud, tools and parts should be removed from the walkways of equipment
- ☐ Keep oil, grease and mud from the soles of your shoes
- ☐ Use three points of contact when climbing up and down ladders
- ☐ Don't carry tools or supplies up or down ladders – hoist them

2) Circle of Life

- ☐ Check completely around equipment before moving it
- ☐ The size of your equipment creates a greater risk while backing-up
- ☐ Check your backup alarm every day

3) Safety Harness

- ☐ Use when entering bins, hoppers, tanks, etc., after power has been lockout/tagout.
- ☐ Inspect the harness frequently for wear and tear
- ☐ Always have another person attending your lifeline when entering bins, hoppers, and tanks
